

# ABOUT AKIJ DOOR

Akij Door, a door brand under the umbrella of Akij Particle Board Mills Limited (APBML), which is a division of the highly regarded AkijBashir Group. Since its establishment in 2001, the company has consistently delivered top-notch products in Bangladesh with a diverse range of doors, encompassing Wood Veneered Doors, PU Lacquered Doors, HPL Doors, Glass Punched Doors, Solid Wooden Doors, Lacquered Solid Panel Doors, Louver Doors, Door Frame and more.

The manufacturing of Akij doors involves the application of European technology and equipment that ensure best design and quality. We employ fully automatic seasoning system that utilizes a high-frequency vacuum dryer and KILN DRYER (KD). This system effectively reduces the moisture content by 10% to 12%, ensuring that the doors remain dimensionally stable in all seasons. Various carefully selected chemicals and processes are applied to ensure optimal adhesion, thickness, design, and strength. This comprehensive approach to the manufacturing process guarantees the longevity and durability of doors, meeting the highest standards of quality and performance.

Akij Door has a strong network of nationwide distribution systems that ensures swift and consistent door supply in accordance with customer requirements.

# HPL / FORMICA LAMINATED DOORS

## **WHERE STRENGTH MEETS ELEGANCE**

High Pressure Laminate also known as HPL/ Formica Laminate, consist of decorative papers that are saturated with melamine resin, synthetic resin, or protective coatings. These doors are characterized by their durability, weather resistance, and low maintenance. HPL doors are versatile, available in a wide array of designs and finishes, providing customized options to suit diverse needs.

# HPL / FORMICA LAMINATED DOORS DETAILS

High-Pressure Laminate (HPL) doors use a multi-step process to achieve their durability, strength, and aesthetic qualities. These doors not only add a touch of contemporary elegance by providing extensive array of colors, patterns, and textures options but also stand resilient against the demands of daily life.

Immerse yourself in the endless possibilities of customization, as our doors offer a canvas for your personal style to flourish.

Crafted with precision, the formica laminate adds a layer of durability, making these doors resistant to moisture, humidity, scratches, stains and temperature variation. This door is suitable for both interior and exterior use in diverse climates. Due to their robust construction and resistance to wear, HPL doors often have a longer lifespan compared to other doors, providing a durable solution.

# DOOR FRAME SPECIFICATION

**Wood Species**

Chemically treated Mahogany wood is entirely free from termite, insects, white rot, borer, etc.

**Seasoning of Wood**

A fully automatic high-frequency vacuum dryer & KILN DRYER (KD) is used to reduce moisture content by 10% to 12%; as a result, no dimensional change occurs in any season.

**Corner Joint**

Dovetail joints are solid and effective at joining two pieces of wood at a right angle which is strictly followed.

**Nail**

Two pieces of the 3-inch nail are used at each side to strengthen the joint.

**Black Oxide**

Black oxide is used outside the door frame to prevent moisture gain from the wall.

**Shrinkage & Swelling**

The moisture percentage is strictly controlled to make the Door Frame shrinkage and swelling-proof.

# FLUSH DOOR FEATURES

Special features of our product surfaces

Especially attractive appearance

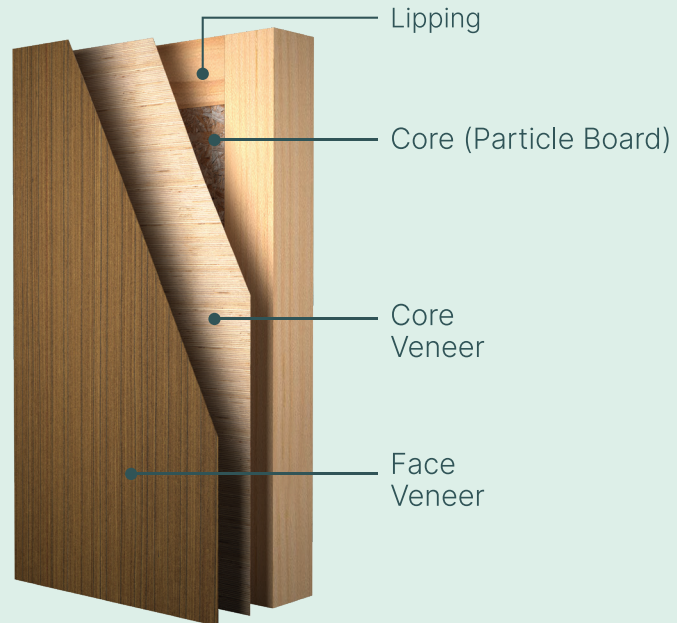

Light-resistant

Heat-resistant

Multi-coat lacquering

## Lipping

Chemically treated and seasoned wood with automatic high frequency vacuum dryer & KILN DRYER (KD).

## Core

Akij door features the carefully selected best Akij particle board as core, ensuring high durability through the utilization of imported thermosetting adhesive in Akij particle board.

## Core Veneer

0.5/0.6 mm thick commercial grade wood veneer between surface and core, chemically treated to avoid borer attack.

0.5/0.6 mm thick Garjon/any hardwood veneer between surface and core.

## Face Veneer

Superior grade of 0.30 mm thin face and back veneer of Burma Teak, Golden Teak, Super Teak, Crown Teak, Teak Champ, and Garjon on both sides of the Door.

## Adhesive

Thermosetting UF resin, antifungal, and anti-termite agents are used with the adhesive to protect the door against fungal and termite attacks.

## Thickness

Nominal thickness of Door:  $\pm 36$  mm

## Shrinkage & Swelling

The moisture percentage is strictly controlled to equilibrium moisture content to make the door shrinkage and swelling proof.

## Dimensional Tolerance

Tolerance on width and length shall be  $\pm 1.0$  mm, tolerance on thickness shall be  $\pm 1.0$  mm, and tolerance on squareness shall be 1.5 mm based on the EN1529 standard.

## After Sales Service

The company will provide after-sales technical services to all sorts of Akij Doors against any manufacturing fault.
